

Access Multiple Gmail Accounts

Do you have more than one Gmail account?

1. One for personal use
2. One to use when to register for a website (to ensure your personal email is not spammed .

Previously, Gmail accounts have only allowed users to access a single account at a single time when using the same web browser.

Google has changed that by enabling multiple account sign-in, allowing users to access multiple Gmail accounts at the same time within the same browser.

To enable multiple account sign-in, log in at <http://google.com/accounts> and under "**profile**" select "**Multiple sign-in**".

At the moment, this feature is only available for desktop browsers and not all Google Services currently support multiple account sign-in.
