Microsoft Image Composite Editor

Free program will stitch your photos into a panoramic photo automatically.

It is an advanced panoramic image stitcher. Given a set of overlapping photographs of a scene shot from a single camera location, the application creates a high-resolution panorama that seamlessly combines the original images. The stitched panorama can be shared with friends and viewed in 3D by uploading it to the [Photosynth](#) web site. Or the panorama can be saved in a wide variety of image formats, from common formats like JPEG and TIFF to the multiresolution tiled format used by Silverlight's [Deep Zoom](#) and by the [HD View](#) and [HD View SL](#) panorama viewers.

It works on 32-bit and 64-bit versions of Windows XP, Windows Vista, and Windows 7.

LOST VOCALS FROM MOVIES

The site takes clips from old movies and restores the actor's real singing voice to the scene.

On the Main Page you'll find a set of featured videos, but if you truck on over to the Videos section you'll find even more! This site is a real gem, not only do you get hear the real voices of the performers but most of the videos have information about what you're seeing, sometimes from the actor themselves.

Keep your privacy online

Protect your IP address.

A proxy is an effective way to obscure your IP address. It fetches Web pages & online communication for you.

Web sites see the proxy's IP address rather than yours.

Privoxy is a combination proxy and filter.

Slide 1 of 2

It's filter features can be set to block cookies and Web page advertisements.

It is relatively easy to set up, but filters may require some know-how.

Privoxy will work with Windows or OS X systems and most Web browsers.

GET THE LOWDOWN ON YOUR SYMPTOMS

The Internet offers a wealth of health information. Unfortunately, a lot of this information comes from questionable sources.

Use a reputable source like the Mayo Clinic.

It offers a symptom checker on its Web site. Start by choosing a symptom. Then, answer a couple of questions about the symptom. You'll see a list of possible causes.

You should not use the Symptom Checker to diagnose medical problems

Let the Symptom Checker will help you decide when it's time to see a doctor.
