

Aneurysm Alert Checklist

A good website: <http://www.brain-aneurysm.com/contents.html>

Get help immediately for the following symptoms!

Unruptured Aneurysm:

New or unusual headaches
(including regular morning headaches)

Unexplained nausea and vomiting

Headache with neck stiffness
Neurological impairment
[e.g., new double vision, episodic loss of vision, vertigo (dizziness), limb weakness, gait imbalance]

New-onset seizure disorder

Ruptured Aneurysm

Sudden, excruciating headache
(including during emotional or physical strain)

Headache with neck stiffness

Sudden neurological impairment
(including one-sided body weakness or physical collapse)
