**Disable Screen Rotation on Kindle Fire HD**

The [Kindle Fire HD](#) has Screen Rotation enabled by default. The screen will automatically flip to landscape or portrait view depending on how you hold it. Here's how to turn it on or off. You can do this in portrait or landscape mode.

Swipe from the top of the screen down to bring up the Notifications screen and tap the Lock / Unlock icon.

To turn rotation back on, just tap the icon again.

When you are watching a movie or playing a game, it will automatically stay in its default orientation, so you won't need to worry about locking the screen then.
