

Start Menu for Windows 10 Stopped Working?

Several Technology Club members reported that their Start Menu or Start Button stopped working in Windows 10. One member Googled the problem (Yeah! Our standard suggestion.)

Thanks to Keith Hoile who found this website with suggestions. Try to click it, not type it.

The second solution worked for him (the first did not). The rest are unknown apparently.

George Carlin used to joke about “I found it in the last place I looked. Well ... did you keep looking after you found it?” Guess the same sentiment applies here.
